## 60 Days and Counting! The 2024 Total Solar Eclipse

**Are You Ready?**

Dear Marjorie,

One of the most spectacular of all events, a total solar eclipse, is coming April 8 to large parts of the U.S., Canada, and Mexico. The eclipse is a once-in-a-lifetime event and will dominate the headlines and offer a unique opportunity to observe and photograph this phenomenon. This year totality is up to a remarkable 4 minutes 28 seconds.

**Now is the time to get your observing equipment ready!** Purchase the accessories you need and make sure to test everything well in advance of the event. This newsletter highlights popular and newly announced accessories to enhance your eclipse viewing or imaging experience.

We proudly offer Baader AstroSolar Safety Film, which delivers the highest sharpness

and contrast available. This film is available in ready-made filters, and in sheets and rolls to make your own filters for telescope, binoculars or camera.

We also offer the Baader 2" Herschel Prism, which provide the finest possible detail of surface granulation and sun spots. This may be an ideal time to consider the [Herschel Prism](#) for partial eclipse phases, and for the sun's current high activity period.

**Bonus:** One FREE pair of solar eclipse glasses with all shipments, if they fit into the box without damage and while supplies last.

## **BAADER PLANETARIUM READY-TO-GO ASTROSOLAR FILTERS**

Check out the Baader Planetarium filter options that we offer in a range of sizes. We have quite a few in stock, but expect them to go fast. Be sure to order early.

---

## **BAADER PLANETARIUM ASTROSOLAR FILM**

Want to make your own solar filters? We've got you covered. We offer both [film rolls](#) and [film sheets](#). Check out [the guide to building your own solar filters](#).

Baader Planetarium developed this safety film for the 1999 solar eclipse in Europe and it remains unsurpassed for safety and visual quality.

---

## **KENDRICK ASTROSOLAR FILTERS**

For many years, we have offered these very popular Kendrick Solar Filters made with Baader AstroSolar material. They offer a wide aperture and three long nylon screws that will not mar your telescope. Be sure to order the [Kendrick](#)

AS50A4-5	5 Sheets of A4 size	\$190 + \$12.50 shipping (reg: \$215 + shipping)
AS50A4-10	10 sheets of A4 size	\$370 + \$12.50 shipping (reg: \$430 + shipping)
